Who Looks After the Sea?

Instructions for Teachers & Task Leaders

Scene Setting
UK seas are home to incredible wildlife - from tiny crabs and seaweeds to dolphins and seabirds. But pollution and overfishing threaten marine life. Marine conservationists work with communities and scientists to protect these habitats.

Activity:
Marine Protection Poster
Choose one marine species (fish, eel-grass, seahorse, dolphin, etc.).
Create a poster to raise awareness of:

- Why this species is important
- The threats it faces
- How people can protect it

Careers Spotlight: Marine Conservationist

- Protects sea life and habitats
- Works with scientists and communities
- Needs communication, research, and teamwork skills

Curriculum Links

- Science: Human impact on environments, living things
- Geography: Coasts, marine environments
- PSHE: Community action, sustainability

Reflection
What one action could you take at home or school to help the sea?

Green Jobs for Nature
