WOODLAND DETECTIVE

Name: _____

Environmental researchers look for clues in nature to understand how a place is changing.

Look carefully at the woodland below.
Then complete the activities.

1. Can you spot and count?

Write how many you can find.

Birds	
Insects (bees, butterflies, dragonflies)	
Mammals	

2. What do you think?

If researchers found more wildlife than last year, what might that tell us?

- ◯ The woodland is becoming healthier.
- ◯ The woodland is staying the same.
- ◯ The woodland is becoming less healthy.

3. Missing Species Challenge

Can you think of an animal that could live in this woodland but isn't shown in the picture?

Draw it in the box.

My species: _____

I chose it because:

_____

_____

4. Reflection

Why do you think environmental researchers count wildlife?

_____

_____
